ACCORDING TO CHAPTER 295.34(c) OF THE TEXAS ADMINISTRATIVE CODE UNDER THE TEXAS DEPARTMENT OF STATE HEALTH SERVICES THE FOLLOWING APPLIES:

(c) Conditions requiring a mandatory asbestos survey for ACBM. Prior to any renovation or dismantling within a public building, commercial building, or facility, including preparations for partial or complete demolition, as required by 40 CFR, §61.145, owners must have a thorough survey performed. The work area and all immediately surrounding areas which could foreseeably be disturbed by the actions necessary to perform the project must be inspected and sampled as applicable prior to renovations or demolition. A copy of the survey report must be produced upon request by the Texas Department of Health (department). If a survey cannot be performed before demolition or renovation is started due to the building being structurally unsound and unsafe to enter, all material must be presumed to contain asbestos and must be treated as ACBM.

***Note:** Waste Connections is the approved vendor for trash services in Manvel call 281-331-0810. Owners is responsible for terminating utilities on property prior to demo.
